

Dual Active Penetrant

Product Description

- Logix is a dual active wetting agent that reduces soil surface tension and increases water penetration.
- The activity of Logix can improve overall soil moisture content by overcoming hydrophobic tendencies of soils, especially those high in sand and organic matter content.
- The soil penetrant capabilities of Logix will move water from saturated soils improving the overall moisture and oxygen content.

Contents

Diocetyl Sulfo Succinate anionic surfactant	40%
Coupling agents, stabilizers ineffective as wetting agents	60%

General Use Guide

Golf Course Greens, Tees and Fairways	<ul style="list-style-type: none"> ▪ Initially Apply 4.0 to 8.0 fluid ounces per 1000 sq. ft. to maximize activity and water movement ▪ Follow up or Spot Treatments should be applied at a rate of 2.0 to 4.0 fluid ounces per 1000 sq. ft.
Athletic Turf	<ul style="list-style-type: none"> ▪ Continue application throughout the growing season until desired results are achieved
Lawns	<ul style="list-style-type: none"> ▪ To optimize soil condition and the activity of Logix, the initial application should be made as early as possible in the growing season.
General Landscape	<ul style="list-style-type: none"> ▪ Under conditions of high temperature and plant stress, use only the low rate application. The product should be applied in the early morning or evening to reduce the chance of plant injury. ▪ Follow the application with sufficient irrigation to move the product into the soil profile.
